SUMMARY

AI-Native Full Stack Engineer with 2 years of experience building AI-integrated SaaS products, real-time voice systems, and DevOps infrastructure in high-velocity startup environments. Founding-day employee at Apex36 Technologies — shipped across the full product stack including AI/ML systems, voice AI, GCP infrastructure, and product growth. Sole developer on two live Omani client products and two internal AI products from zero to production, leveraging Cursor, Claude Code, and Codex as force multipliers.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router, SSR), TypeScript, JavaScript, Tailwind CSS, Framer Motion, Vite
Backend: Node.js, Express.js, REST APIs, Server Actions, Drizzle ORM
Databases: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, ConvexDB
AI / ML: OpenAI APIs, RAG Systems, Embeddings, VAPI, Google Gemini, Vector Search
DevOps: Docker, Google Cloud Run, GitHub Actions CI/CD, GCP (Artifact Registry, Load Balancer, SSL)
Tools: Git, Postman, GA4, PostHog, Mapbox GL, i18next, Resend, Cursor, Claude Code, Codex

WORK EXPERIENCE

APEX36 TECHNOLOGIES | Mumbai, IN

Jul 2024 – Present

Frontend Engineer

Jul 2024 – Jul 2025

Full Stack Engineer

Jul 2025 – Present

Client delivery via Vedteq (Oman) and Basira (Oman) — Apex36 partner companies for international work

- Sayyar** (sayyar.om): Sole FE + BE developer on Oman's first transportation SaaS — built admin dashboard (Vite, React, TypeScript) covering fleet, bookings, payments, real-time routes (Mapbox GL), and Arabic/English RTL i18n
- Architected Express 5 backend with dual MySQL databases (Drizzle ORM), JWT auth with server-side token invalidation, geolib-based coordinate trip matching, and cross-database join logic for subscription bookings
- StarTech**: Sole Next.js developer of an automated trading control room dashboard — integrated 12+ MongoDB collections tracking live positions, P&L, 40+ performance metrics (Sharpe, Sortino, Calmar, SQN, Win Ratio), engine heartbeat, and strategy browser across Crypto, Forex, Stocks, and Commodities markets
- Mappie.ai** (mappie.ai): Core frontend architect on AI SaaS that converts product ideas into structured specs — built ConvexDB embeddings-based vector search, Lexical inline AI editor (Notion-like UX), and OpenAI document generation pipelines; led agile sprints and code reviews for a team of 4 developers
- PiSolved Chat**: Solely built end-to-end RAG chatbot — real-time streaming, thread-based session management, daily quota system, OpenAI Assistants API, PostgreSQL + Drizzle ORM, Resend email workflows for quota upgrades
- PiSolved Platform**: Led full redesign of the landing page and architected the Admin Dashboard; implemented a comments system to boost engagement; managed CI/CD across dev/staging/prod branches while leading a team of 4 developers
- Apex36 — Infrastructure**: Migrated apex36tech.com from Vercel to GCP Cloud Run — multi-stage Docker build, Artifact Registry, External Load Balancer (Google-managed SSL), GitHub Actions OIDC CI/CD; resolved 183 GB bandwidth overages; diagnosed NEXT_PUBLIC build-time env var bug and redirect port-leak
- Apex36 — Analytics & SEO/GEO**: Implemented GA4 custom event taxonomy (14 dimensions, lead/blog/chat conversion funnels, PostHog session replay); executed GEO/AEO audit — SSR'd JSON-LD, expanded sitemaps, deployed llms.txt, AI crawler allowlists; built apex36tech.com from scratch — Next.js, Framer Motion, 90+ SEO score, Firebase-backed blog pipeline

PROJECTS

BrandGen | www.getbrandgen.com

Next.js · TypeScript · Google Gemini · ConvexDB · Better-Auth · Supabase · Tailwind CSS · Framer Motion

- Brand-aligned AI image generator — users upload a brand image or write text guidelines, Gemini extracts brand DNA (colors, style, composition), and the app generates on-brand creative outputs across styles and aspect ratios
- Built solo POC in 12 days; post-MVP led landing page + 3 production PRs: SEO/schema fixes, GEO audit (sitemap 4→25 URLs, CSP), full en/es/zh i18n (230 keys/language, server-side locale detection)
- Drove 100% organic growth via content marketing (LinkedIn carousels, X, Product Hunt, YouTube) with zero ad spend — **62 users · 700+ AI outputs · 1.1M+ tokens used**

ConvoAI | www.heyconvo.com

Next.js · TypeScript · VAPI Web SDK · Deepgram (Aura 2 + Flux) · Better-Auth · PostgreSQL · Framer Motion · Radix UI

- Sole core app developer of a multi-persona voice AI receptionist — 6 industry personas (Healthcare, Real Estate, Sales, HR, Restaurant, Financial Services) with per-persona system prompts, greetings, voices, and UI themes
- Built a voice protection system from scratch: error-rate circuit breaker (3 errors/60s → 60s block with auto-recovery), queue watchdog (60s stuck-call timeout), start-call guards, and provider fallback UX for TTS/transcriber failures
- Implemented real-time transcript + AI actions feed, WebGL-style audio visualizer, and Better-Auth (Google OAuth + email/password) with server-side route protection

DevTinder | github.com/AbhishekPatel1811/DevTinder

React (Vite) · Node.js · Express · MongoDB · Mongoose · JWT · WebSockets · socket.io · AWS EC2 · Nginx · PM2

- Full-stack social platform for developers — profiles, swipe/match logic, real-time chat (socket.io), paginated feed API, full JWT auth flow; deployed end-to-end on AWS EC2 (ap-south-1) with Nginx + PM2 — capstone for an in-depth Node.js internals curriculum
